

Transition Words/Phrases

**Remember, transition words and phrases
are kind of like a map for your writing.**

**They help your reader understand your argument more
quickly and easily.**

**These help you *explain why* evidence
matters.**

This shows that

The average esports player practices 6-8 hours daily. This shows that competitive gaming requires dedication similar to traditional sports.

groovelit

In other words

K-pop groups often train for years before debuting. In other words, the polished performances we see represent countless hours of preparation and hard work.

groovelit

This means

Ocean plastic breaks down into microplastics that marine animals consume. This means our waste directly affects wildlife health and potentially our own food supply.

groovelit

Significantly

Renewable energy projects are becoming more affordable each year. Significantly, solar panel costs have dropped 90% over the past decade, making clean energy accessible to more communities.

groovelit

To put it simply

Mindfulness practices activate the parasympathetic nervous system. To put it simply, deep breathing and meditation physically calm your body and reduce stress hormones.

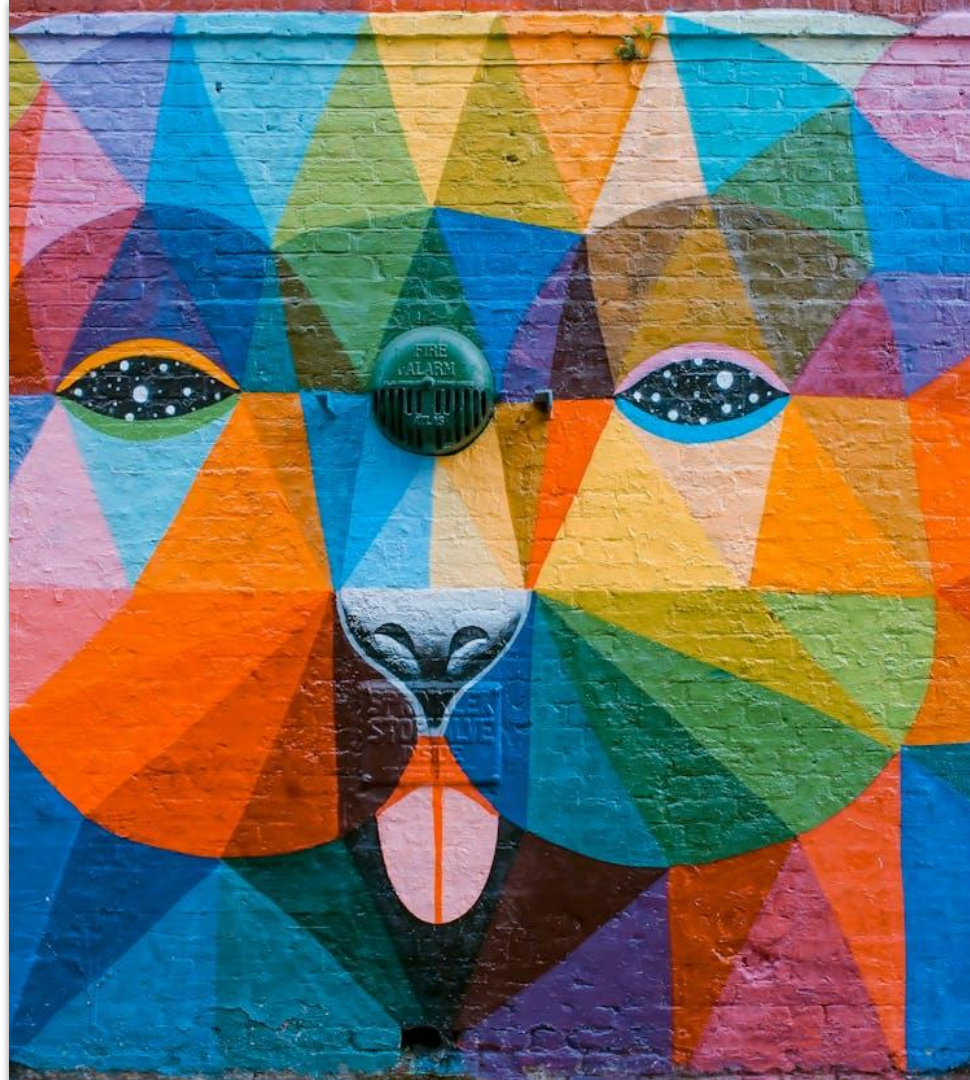

groovelit

As a result

Street art often reflects social issues affecting local communities. As a result, murals can serve as powerful visual commentary on topics like inequality or environmental concerns.

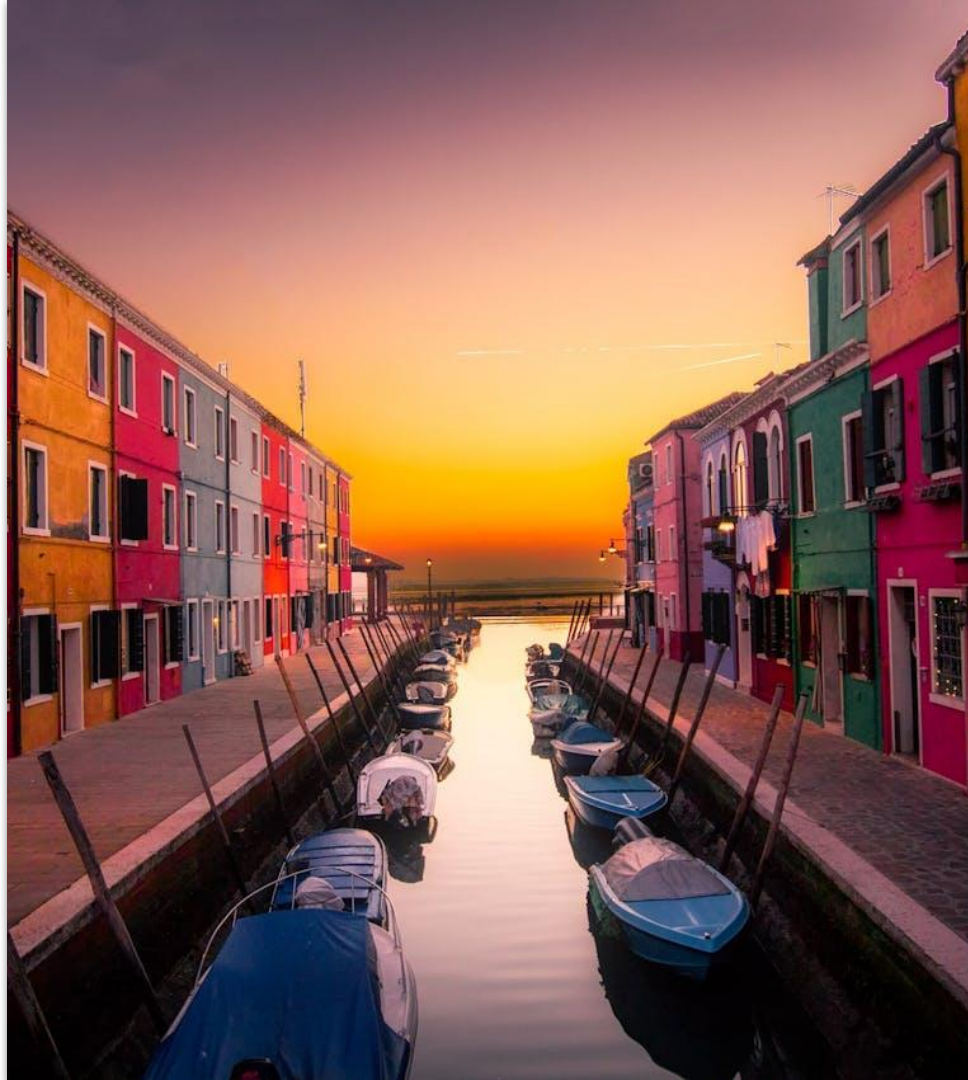

groovelit

This illustrates

Film directors use specific color palettes to convey mood. This illustrates how visual elements subtly influence our emotional response to scenes without us consciously noticing.

groovelit

Therefore

Space exploration technologies often find applications in everyday life. Therefore, research that seems distant from our daily concerns often leads to practical innovations we all benefit from.
